Re: Harbor Island Superfund Site

Ref: (a) U.S. EPA Ltr to LSCC dtd 7/31/86
(b) U.S. EPA Ltr to John Lane dtd 11/6/86
(c) U.S. EPA Ltr to LSCC dtd 11/6/86
(d) U.S. EPA Ltr to Assoc. Shipbuilders dtd 11/6/86

Dear Ms. Cohen:

Lockheed Shipbuilding Company ("LSC") responded to reference (a) in correspondence to you dated October 15, 1986. References (b), (c), and (d) request similar information.

This is to advise that LSC's response to references (b) and (c) is the same as provided in our October 15, 1986 correspondence. LSC cannot respond to reference (d). Associated Shipbuilders was a joint venture between Puget Sound Bridge & Dredging Company ("PSB&D") and Lake Union Dry Dock & Machine Works which existed only from 1940 to 1945, when it was dissolved. Lockheed Aircraft Corporation, the predecessor to Lockheed Corporation, acquired PSB&D in 1959, changing the name three times: Puget Sound Bridge & Dry Dock (1959), and Lockheed Shipbuilding & Construction Company (1965), and LSC (1984). Since Associated Shipbuilders was never connected with this company we have no knowledge or documents concerning environmental issues from that joint venture.

Very truly yours,

Peter D. Balch
Associate Counsel
